INSTITUTE

moves messages

UNDERSTANDING THE BRAIN

A dynamic learning series dedicated to empowering educators with critical knowledge in neuroscience to make informed, research-based decisions that advance student learning.

Choose the program that is right for you.

With three core workshops available, we will work with your team to plan a program that suits your goals. Pick one, mix-and-match, or work with our expert professional development team to customize the content to best help your team to grow and learn.

UNDERSTANDING THE BRAIN

CORE WORKSHOPS (5 hours each)

PART 1

Becoming a Learning Scientist

Debunk prevalent myths about the brain as you learn about the structure and function of our most powerful organ. This workshop is centered around an exploration of the award-winning Your Brain exhibit at The Franklin Institute.

PART 2

Curiosity, Multisensory Learning, & Taking Breaks

Discover how curiosity, multisensory learning, and taking breaks enhance learning for students. Begin to apply your knowledge as you adapt classroom curricula to maximize student learning and engagement.

PART 3

Growth Mindset, Grit, and Mindful Use of Technology

Learn the science of how praise, grit, and the use of technology can impact students' learning and mindset. In this final session, complete and present adapted curricula with peers and create a plan for sustaining use of research-based strategies in the classroom.

A PD unlike any other.

Developed and presented by **experts in the science of learning**, and using The Franklin Institute's signature brand of **interactive, dynamic experiences**, Professional Development at The Franklin Institute is different than any other PD on the market.

HERE'S WHAT SETS US APART:

- **97% of teachers** rate these workshops as better or the best PD they've ever experienced.
- Designed for teachers and administrators at all levels, Understanding the Brain has a proven track record of **aligning entire school districts** behind a common approach.
- As a result of participating in the Understanding the Brain PD series, teachers and administrators have reported a **significant change** in knowledge, attitudes, beliefs, and practices related to the brain, teaching, and learning.
- Experiencing PD out of the district at a museum allows teachers to **take a fresh approach** to thinking about their work, and enjoy a **fun hands-on learning opportunity** with their colleagues.
