From the discovery of the first angiogenesis inhibitors to the development of controlled drug delivery systems and the foundation of tissue engineering

honoring Professor Robert Langer
recipient of the 2016 Franklin Medal in the Life Sciences

“For his design and implementation of multiple innovative drug delivery systems and for his founding work in the field of tissue engineering. As a serial entrepreneur, Dr. Langer established a new paradigm for translating academic ideas into practical products.”

APRIL 22, 2016
9:00 – 10:30AM
Behrakis Grand Hall
Drexel University
3210 Chestnut Street
Philadelphia, PA 19104

Robert S. Langer, Ph.D.
David H. Koch Institute Professor, MIT
Harvard-MIT Division of Health Sciences and Technology
Koch Institute for Integrative Cancer Research
