Volcanoville: Predicting Eruptions

IN THE WORKSHOP VOLCANOVILLE: PREDICTING ERUPTIONS YOUR STUDENTS WILL BE EXPLORING THE INTERACTIONS BETWEEN GEOLOGICAL PROCESSES AND HUMAN CIVILIZATION AS THEY DETERMINE THE BEST LOCATION FOR BUILDING A HOTEL NEAR AN ACTIVE VOLCANO.

The Changing Earth exhibit also explores processes that shape the earth and the ways those changes affect humans. Help your students make connections between the workshop and Changing Earth by using the Exhibit Research Sheet (below) to guide students’ exploration of this exhibit.

The Changing Earth Educator Guide contains more information and resources relating to the exhibit, including additional activities and curriculum connections. Find it at www.fi.edu/teachers/educator-guides.
Volcanoville: Predicting Eruptions

CHANGING EARTH EXHIBIT RESEARCH SHEET

Draw or write about something in the exhibit that talks about changes to the Earth caused by magma.

Draw or write about something in the exhibit that talks about how the Earth's changes affect human civilizations.

What is one new thing you learned from this exhibit?

What new questions do you have about geology and the processes that change the Earth?
