

SCIENCE & STORIES: INTEGRATING SCIENCE & LITERACY

Make STEM approachable, fun, and interdisciplinary by pairing it with your favorite children's books.

A program dedicated to elevating children's engagement and skills in science and literacy.

Choose the program that is right for you.

Designed to be customized to suit your goals, all *Science & Stories* workshops are based in our core program, then customized by age group and science theme to give you the tools you need to facilitate science literacy programming in your preschool, elementary school, library, or out-of-school time organization.

SCIENCE & STORIES: INTEGRATING SCIENCE & LITERACY

CORE PROGRAM (5 hours)

Learn how to engage children and families in the process of science through high quality children's books. In any *Science & Stories* workshop, The Franklin Institute's expert professional development team will guide you through the process of engaging students and their caregivers in making observations and predictions, asking questions, and testing ideas using children's books and hands-on science activities.

CUSTOMIZATIONS

1 Are you a **preschool educator, elementary educator, librarian, or out-of-school-time professional**? We will target the content of your workshop to suit the kind of environment in which you will be facilitating the curriculum.

2 Your workshop will come paired with a curriculum guide, based in one of ten **science themes** of your choice:

Balance*

Sound*

Wind & Air*

Light & Shadows*

*available for pre-school ages

Water*

Measurement*

Magnets

Structures

Engineering

The Process of Science

A PD unlike any other.

Developed and presented by **experts in the science of learning**, and using The Franklin Institute's signature brand of **interactive, dynamic experiences**, Professional Development at The Franklin Institute is different than any other PD on the market. Our training and curriculum resources have empowered library and out-of-school time professionals across the country to become **more comfortable facilitating science learning** for children and families, and helped schools and teachers **create interdisciplinary learning experiences** that are aligned with Next Generation Science Standards and Common Core Standards.

Pricing

All pricing is for one core workshop.

Ask us about pricing for one or two hour speaking engagements, or purchasing additional science and literacy curricula.

All workshops accommodate a minimum of 20 and maximum of 100 people. Special pricing applies to groups of 40+. Inquire for details.
